

Please reject NAB's petition 04-160. In the spirit of access I should have the right to access whatever radio signals I desire be they through the traditional FM/AM or by satellite. Satellite Radio provides me access to media I would otherwise not have access too like Air America, which because the members of NAB have the ability to pick and choose what I get to hear on their stations. Do not limit my access to my choice of broadcasting in any manner.
